

Hybrid and Electric Vehicles: Activities in the UK

Dr Bob Moran
Head of Regulation and R&D

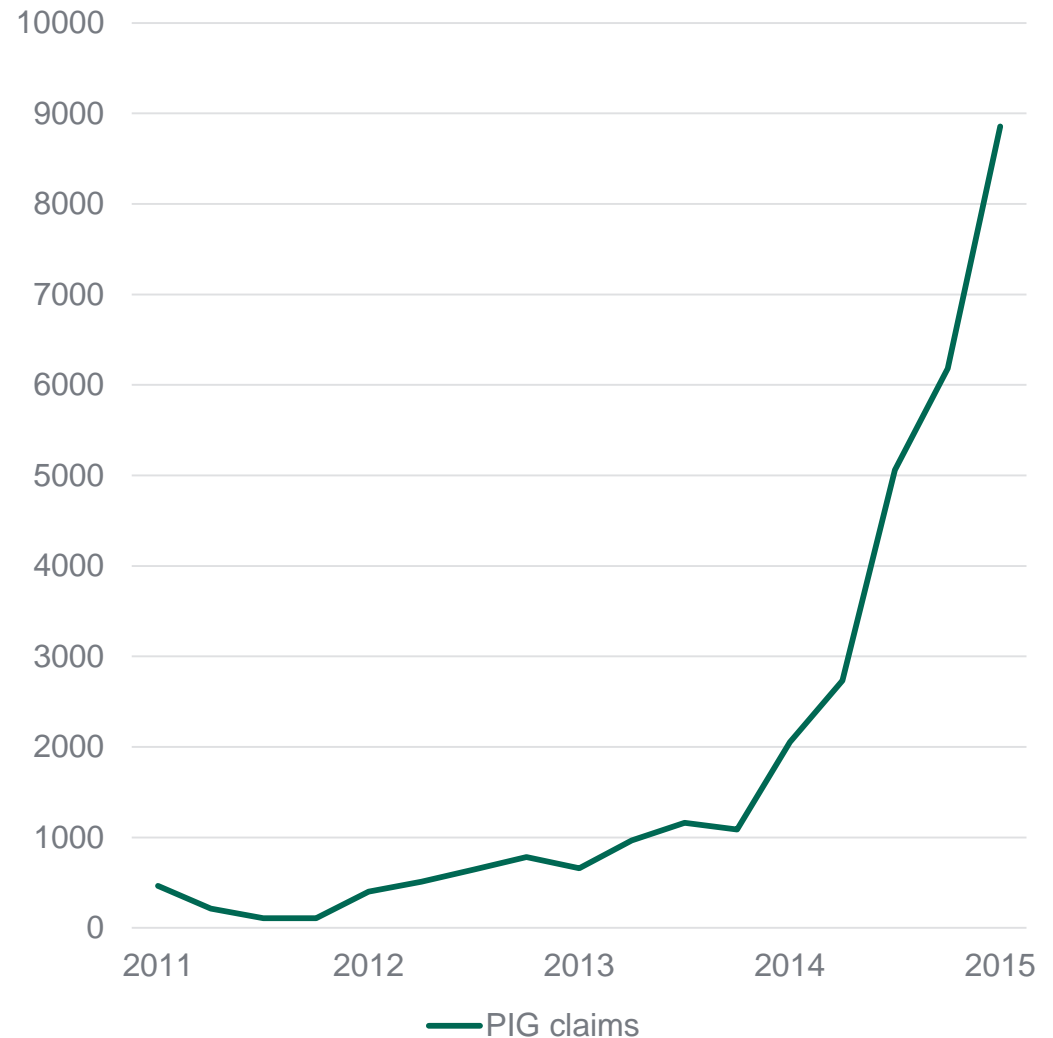

Supporting the early market for ULEVs

- ▶ The Office for Low Emission Vehicles (OLEV) is the UK Government's dedicated delivery body supporting the early market for ultra low emission vehicles (ULEVs) in the UK.
- ▶ Funding of more than \$900m has been allocated for 2015–2020 to ensure the UK is at the global forefront of the design, manufacture and use of ULEVs.
- ▶ Our work with industry, backed by targeted funding support, is paying off.
- ▶ In 2014:
 - ▶ 1 in 4 ULEVs sold in Europe were made in the UK.
 - ▶ Claims for our consumer car grant were four times higher than in 2013.

Plug-in Grant claims by quarter

UK Policy Drivers

- ▶ Inward investment
- ▶ Growth and jobs
- ▶ Carbon
- ▶ Air quality
- ▶ Energy security
