

## FOUR GOOD REASONS FOR YOUR PARTICIPATION

### EXPERT FORUM:

Don't miss the newest trends and solutions! Experts of the leading battery and charger manufacturers inform you about the newest innovations.

### EXHIBITION:

Find new contacts on the booth and get advice from experts about new products and technologies.

### TRAINING SEMINARS:

Expand your knowledge with the most important basics and developments in the field of Li-ion battery technologies and battery management systems.

### FUN PARCOUR:

Experience the e-mobility! Drive a few rounds with an electric car or an e-bike. Just have fun with tomorrow's vehicles!

44 - 109 Gliwice  
Poland

# 11TH DEVELOPER FORUM BATTERY TECHNOLOGIES

## MAIN TOPICS

# 11TH DEVELOPER FORUM BATTERY TECHNOLOGIES JUNE 28-30, 2016

### Welcome to the 11th Developer Forum Battery Technologies first time in Poland!

Looking back at the successful Developer Forums "Battery Technologies" that have been organized in Aschaffenburg (Germany) for 8 years, and this year for the first time in Hamburg (Germany) we have a feeling that this should develop further. Therefore, we would like to invite you to our 11th Developer Forum to Poland.

Poland is located in central Europe and is, among others, one of the fastest growing CEE markets. That is the reason why we would like to invite the experts on battery industry and technologies to meet in Poland. This three day event will gather experts from all over the world to share their knowledge and experience regarding new battery technologies.

Developer Forum "Battery Technologies" has been established in order to offer the industry, as well as the end user, the possibility to inform about the latest technological trends from experts at first hand. In Poland we will have a closer look on Li-ion battery technologies and battery safety in respect to current regulations.

- > History and Future of the Battery Market – Technology Change
- > Basics of Lithium-Ion Technology
- > Cell Chemistry and Technology Comparison
- > Battery Safety and Legal Requirements
- > Assembling of Batteries: Now and Tomorrow
- > Energy Storage Solutions

**Program** detailed schedule will be available online.

### Panel discussions

The Forum, for the first time in the history, will also open panel discussions, sessions dedicated to specific issues where people from different branches meet together in order to discuss a particular problem from their perspective.

### Accompanying exhibition

During the exhibition, you have the possibility to acquire information at various exhibitor stands and establish new business contacts.

### Extras:

- > Gala Dinner
- > Electric Vehicle Fun Drive  
(Tesla, Govecs, New Melex)
- > Worldclass Key Note Speakers  
(Sony, Panasonic, LG)

## REGISTRATION:

---

company

---

first name, name

---

zip-code, city, country

---

street, house-no.

---

phone

---

email

---

your order no./ your EU VAT no.

If your invoice is different please use the registration form on our homepage.

### Fees Participants

Early Bird (Feb 2016)	110 EUR
Normal (May 2016)	150 EUR

### Fees Exhibitors

Early Bird (Feb 2016)	600 EUR
Normal (May 2016)	650 EUR

All prices excluding Polish VAT 23%

We recommend to book table top exhibition in advance as the number of stands is limited

Herewith I register bindingly for the 11th developer forum according to the general terms and conditions of the Batteryuniversity GmbH:

### Participation:

June 28-30, 2016

Online registration starts in November 2015.

In order to register go to  
[www.developer-forum-gliwice.com](http://www.developer-forum-gliwice.com)

---

date/signature

Please register by email/fax to:  
[developer.forum.gliwice@batteryuniversity.eu](mailto:developer.forum.gliwice@batteryuniversity.eu) · Fax +48 32 78 42 451

Please do not pay before having received the invoice!
